

Unlock IoT Integration Opportunities!

Join the EnOcean SmartServer IoT Partner Program to access the most complete, affordable, and easy-to-deploy smart gateway solution for integrating IoT devices, smart buildings, industrial networks, and cloud applications.

SmartServer IoT includes a user-friendly browser-based front-end for simple system set-up and management

KEY BENEFITS:

- Certified training (webinar, in-office, and online modules)
- Pre-sales support by EnOcean field application engineers (FAE)
- Qualified lead referrals and new business opportunity (NBO) registration
- Listing on EnOcean's website partner page
- Specialized sales collateral and technical tools
- Free technical support via email
- Application design/integration support
- Co-op marketing opportunities

ELIGIBILITY:

Open to developers and integrators with a solutions-oriented sales force, strong reputation, and broad geographical coverage.

First truly open industrial edge server platform that integrates legacy control networks with any IoT application and cloud platform:

- Secure IoT messaging to cloud services
- Multi-protocol support with BACnet certification
- Edge device management
- Network management
- Open APIs for controls and web apps
- Open interface for IoT devices and protocols
