

SMART HEALTHCARE

EnOcean
Sustainable IoT

Supporting Care, Every Step

Ensure the right support at the right time – for better patient care. From keeping medical equipment within reach to optimizing resources in elderly homes and home care, real-time asset tracking enhances efficiency where it matters most. **Give caregivers the tools they need to focus on what truly counts: people's well-being.**

BETTER CARE, WHEN AND WHERE IT'S NEEDED

- Ensure medical equipment, wheelchairs, and mobility aids are always available when patients need them.
- Reduce time spent searching for essential tools so healthcare professionals can focus on patient care.
- Medical equipment is always maintained on schedule and audit-ready, reducing downtime and simplifying compliance.

More time for patients, less time searching

ELDERLY HOMES THAT FEEL LIKE HOME

- Create a safer and more comfortable environment by ensuring facilities are well-equipped and well-managed.
- Support staff with smart resource allocation, reducing unnecessary steps and improving efficiency.
- Optimize energy use to create a more sustainable and cost-effective living space.

Smart care for a warm and safe home

HOME CARE, MADE MORE PERSONAL

- Help caregivers spend more time with patients and less time coordinating equipment and supplies.
- Ensure necessary medical devices are always in the right place for the next visit.
- Reduce waste and inefficiencies, allowing care organizations to provide better support to more people.

Bringing ease to every visit

Partnership with HPE Aruba Networking

The EnOcean integration with HPE Aruba Networking allows seamless communication between EnOcean IoT devices and network infrastructure from HPE Aruba Networking. Thus, businesses are able to manage IoT data using their existing Wi-Fi setup. This integration lets companies leverage their current IT infrastructure to incorporate IoT sensors into their network, while maintaining full compliance with security standards, thanks to HPE Aruba Networking's robust security features.

Unlocking true benefits

- Long-lasting solutions with a compelling total cost of ownership (TCO)
- Seamless global operation – indoors and outdoors
- Combines apps, reporting, and real-time alerts to enhance key healthcare processes
- Adherence to regulations, cybersecurity, and global technology standards
- Easy integration with existing systems and expert hardware guidance

EnOcean provides smart, sustainable IoT technology including sensors that can operate without batteries, cables, or need of maintenance by means of energy harvesting. Solutions from EnOcean can integrate seamlessly into existing wired and wireless systems, including Wi-Fi access points. Used in building automation, smart homes, lighting, industry, logistics, and aviation, EnOcean helps to optimize the carbon footprint of buildings and spaces. Leading partners worldwide rely on hardware and software solutions from EnOcean.
